VIVACY
PARIS

Discover the world of
AUTHENTIC BEAUTY

VIVACY employees have taken on the role of official **brand ambassadors**. Women and men of different ages, embodying the brand and all it represents with style and elegance.

* V for life

In France

There is a V for
verity
*The truth of an instant.
The truth of a feeling, of an emotion.*

There is a V for
voir
*which means to see.
To see yourself in the mirror.
To be seen.
To see the effect you have on others.
To see time pass and beauty remain.*

There is a V for
vouloir
*which means desire.
The desire to make yourself beautiful.
To make yourself younger.*

There is a V for
victory
*There is a "Vous".
Vous is you.*

Collaborator at Laboratoires VIVACY

*"It's all about prevention and starting at the right time...
doing it in a way that will be beneficial later on in life. I want to look after myself,
keep my natural beauty, but at the same time, not limit myself
in everyday life with over-the-top beauty routines –
simplicity is key!"*

WHAT HAPPENS TO OUR SKIN AT 30?

IN OUR EARLY 20'S,

the skin is rich in collagen, supple thanks to plenty of elastin, radiant with youth and renewing cells at a fast rate.

FROM AS EARLY AS OUR 30'S,

the production of collagen and hyaluronic acid naturally present in the dermis has already begun to decrease. Daily stress, fatigue, hectic lifestyle, poor diet and certain environmental factors (ex. sun, pollution) can cause the skin to breakout or become dry, eventually leading to the premature development of fine lines and wrinkles.

It is important to take preventative action in order to keep the skin looking young, well hydrated and protected from external damage.

Anti-ageing treatments are not only reserved for older people. Today, innovative and efficient ways exist to help younger people keep their skin healthy, **delay the first signs of ageing**, while preserving their facial features.

“MOLECULE OF YOUTH” HYALURONIC ACID IN AESTHETICS

HYALURONIC ACID

is one of the basic structural components of the skin which ensures **hydration**, **suppleness** and **skin tone**¹.

It can hold up to **1000 times** its weight in water².

When used in aesthetic medicine, hyaluronic acid is transformed into a transparent gel and can be adapted to treat a number of different needs: Volume loss, hydration, wrinkle filling....

³ Laboratoires VIVACY (France). Biodegradable cohesive monophasic hydrogel. WO2009/071697 A1. 2008.

* STYLAGE® HydroMax only.

WITH OVER 15 YEARS

of experience in **hyaluronic acid**, Laboratoires VIVACY (France), experts in aesthetic and anti-ageing medicine, have developed a versatile range of resorbable dermal fillers called **STYLAGE®**.

The formulation uses VIVACY's patented IPN-Like technology³ to combine stabilised hyaluronic acid and the antioxidant, mannitol or sorbitol, to provide premium products for a maximum number of ages and skin types.*

WHAT DOES THE PROCEDURE INVOLVE?

INJECTING STYLAGE®

is a **medical procedure** that must be performed in a **medical clinic** and carried out by a properly **trained medical professional** with good anatomical knowledge and injection techniques involving **hyaluronic acid**. Your practitioner will establish a **treatment plan** that is best suited to your personal needs and will decide which products to inject to achieve the **desired results**.

The volume of product injected, with a needle or cannula, depends on the patient's needs and desired result.

RESULTS ARE VISIBLE STRAIGHT AFTER TREATMENT

HOW LONG DO THE RESULTS LAST?

RESULTS DEPEND

on a variety of factors: skin type, areas treated, quantity of **product injected** and **the technique used**⁴.

*The results are visible between 6 and 18 months⁴.
Regular top-up sessions will prolong the
desired level of correction.*

IS THE TREATMENT PAINFUL?

INJECTING HYALURONIC ACID

may cause discomfort or slight pain depending on the individual. To make the procedure more comfortable for the patient, the **STYLAGE®** range contains products with or without **anaesthetic*** (Lidocaine).

**TALK TO YOUR PRACTITIONER ABOUT WHICH PRODUCT
IS BEST SUITED TO YOUR NEEDS.**

* STYLAGE® Lips Plus is only available with Lidocaine.

VIVACY®
BEAUTY

MY ANTI-AGEING RITUAL

To accompany patients after **aesthetic medical treatments** and help them **preserve the quality** of their skin on a daily basis, Laboratoires VIVACY offers a **premium dermocosmetics range** containing hyaluronic acid, antioxidants and powerful active ingredients.

Each of these **high-quality products** have clinically demonstrated their efficacy and adapt to your **individual skin concerns**.
